## P. W. Grosser Consulting receives “Best Civil Engineering Firm to Work For” award

**October 22, 2007:** CE News presented P.W. Grosser Consulting (PWGC) with the “**Best Civil Engineering Firms To Work For**” award for being an industry leader in creating a flexible, challenging and quality workplace on October 4, 2007.

Each year, CE News magazine conducts a survey of the Best Firms to Work For. The survey is quite unusual: Firms are rated by their own employees, on its ability to provide a well-balanced, supportive professional working environment that fosters the success of the individual and the business.

This annual award is presented to the firms that rank highest in the submittal process, which includes a corporate statement of qualifications and an employee satisfaction survey. Other survey metrics include total billings during the last five years, turnover rates, history of downsizing events, training and mentoring programs, internal communication, culture, insurance and fringe benefits, and compensation and bonus practices. Ranking categories for the approximately 145 national firms that participated, are categorized by: small, mid-size, large and overall (combination of small, mid and large).

“We are honored to rank in the Top 20 “Best Civil Engineering Firms to Work For” small-size firm, and in the Top 50 overall”, says PWGC’s President and founder, Dr. Paul W. Grosser, PE. “We are aware that our success relies on the continuous growth and development of our people. To support this, we maintain a semi-annual performance and development review program, a generous benefits package, emphasis on career and development and continuous training.

In closing, he adds “The CE News survey results indicate the pride that our team members have working here at P.W. Grosser Consulting, and I am proud to work with each and every one of them.”

**P.W. Grosser Consulting (PWGC)** is located in Bohemia, NY. The firm provides municipal and private clients with quality environmental consulting and engineering services. PWGC offers flexible solutions to clients in Government, Commerce, Manufacturing, and the Private and Public Sectors, ranging from the Real Estate, Institutional, and Healthcare Markets to Aviation and Energy.

PWGC specializes in soil/groundwater contamination and investigations, sampling and monitoring at hazardous and non-hazardous waste sites, and environmental compliance. For over 16 years, PWGC has managed a multitude of engineering projects emphasizing natural resource investigations and compliance management, such as remedial design at inactive hazardous waste sites, environmental investigations and sampling at Superfund sites, overall site planning, water supply optimization, wastewater treatment, and solid waste management. PWGC personnel include civil, sanitary, and environmental engineers; hydrogeologists; geologists, and environmental scientists.

**CE News magazine**, a monthly business-to-business magazine serving the civil engineering and land surveying markets exclusively, to provide readers with a meaningful ranking of several human resource issues in the civil engineering industry.
